How to Install Anaconda

1. **Navigate to the Anaconda Website**:
   - o Go to www.anaconda.com.
2. **Download Anaconda**:
   - o Click on the "Free Download" button to go to the download page.
   - o Click "Skip Registration"
3. **Select Your Operating System**:
   - o Download the version for your operating system (Windows, Mac, or Linux).
     - ▪ **For Mac Users**:
       - ▪ If there are multiple options, click the Apple menu and select "About This Mac" to determine your system's specifications. Choose the appropriate installer based on this information.
4. **Install Anaconda**:
   - o Locate the downloaded file and click on it to start the installation process.
   - o Follow the on-screen instructions to complete the installation.
5. **Update Anaconda**:
   - o If prompted to update Anaconda during installation, proceed with the update.
6. **No Sign-Up Required**:
   - o You do not need to sign up or enter your email address after the installation is complete.
7. **Launch Jupyter Notebooks**:
   - o Open Anaconda Navigator.
   - o Click "Launch" under Jupyter Notebook.
8. **Access Jupyter in Your Browser**:
   - o Jupyter Notebook will open in your default web browser.
9. **Installation Complete**:
   - o You are done! In class, you will be asked to open specific Jupyter files, which you will download from Canvas.
